07:30 – 11:30 am	<b>Value Based Care and Its Implications: Preparing for Bundled Payments and CJR</b>	<b>Labrador Healthcare Consulting sponsored by Pacira Pharmaceuticals, Inc.</b>	<b>Silver Corporate Partner</b>
	<p>There are seven key strategies required to successfully implement bundled payments. They require both time and financial investment of all providers who care for bundled patients. This includes physicians, nursing, social work and hospital administration. Success at bundled payments enhances the financial viability of hospitals and clinicians, and most importantly, these strategies result in improved outcomes and better care for our patients, which is the ultimate goal of all providers.</p> <p>Joseph A. Bosco, MD is Vice Chairman of Clinical Affairs and the Director of the Center for Quality and Patient Safety at NYU Hospital for Joint Diseases at the NYU Langone Medical Center. He is a practicing orthopaedic surgeon recognized as a thought leader in value based payment and quality as well as an experienced consultant. Dr. Bosco has been named Castle Connolly Top Doctors for the New York Metro Area and most recently received the American Academy of Orthopaedic Surgeons Achievement Award.</p> <p>Richard Iorio, MD is Chief of Adult Reconstruction Division at NYU Hospital for Joint Diseases. He designed and successfully implemented the Bundled Care Payment Initiative for total joints as well as developed and initiated our facility's same day total joint program. Dr. Iorio is the Chair of the American Association of Hip and Knee Surgeons Committee on Advocacy and Healthcare Policy. He is nationally recognized as a thought leader on perioperative risk optimization.</p>		
09:30 – 11:30 am	<b>Protecting Your Patients: Incision management following complex primary and revision joint arthroplasty</b>	<b>Acelity™ / KCI™</b>	<b>Bronze Corporate Partner</b>
	<p>Why be concerned about surgical incisions? Hear from a panel of your peers – H. John Cooper, MD of Lenox Hill in New York and Denis Nam, MD of Washington University School of Medicine and Barnes-Jewish Hospital in St. Louis, as they discuss case studies, scientific evidence and patient outcomes surrounding the use of incisional negative pressure wound therapy following these procedures.</p>		
12:00 – 2:00 pm	<b>Multimodal Pain Management for Total Hip and Knee Arthroplasty Patients: Current Concepts and Controversies 2016</b>	<b>Mallinckrodt Pharmaceuticals</b>	<b>Bronze Corporate Partner</b>
	<p>This symposium topic is value and quality in MMA for TJA.</p>		

12:00 – 2:00 pm	<b>Creating value with optimal outcomes and premier patient experience in Total Knee Arthroplasty</b>	DJO Global	<b>Gold Corporate Partner</b>
<p>Value-based delivery and payment models are the topic of intense debate within the orthopaedic community and are fundamentally changing the practice of orthopaedic surgery. Bundled payments and other value-based methodologies have largely been focused thus far on primary joint replacement. In addition, patient outcomes and satisfaction are increasingly incorporated into the value-based payment models that affect hospital and surgical reimbursement and compensation.</p> <p>This symposium will center on relevant discussion points surrounding total knee arthroplasty that drive value and create premier patient experience. Discussion topics include perioperative pain control, patient selection and risk factor optimization, controlling costs in the episode of care, choosing the optimal surgical and recovery setting and surgical techniques and implants to optimize patient function. At the conclusion of this symposium, the attendee should be able to identify ways to optimize the value of total knee arthroplasty through enhanced quality and cost-reduction methodologies.</p> <p>Program Chairs: James A. Browne, MD, R. Michael Meneghini, MD, Michael J. Taunton, MD</p>			
12:00 – 2:00 pm	<b>A Common Sense Approach To Legal Tools: The Key To Lawsuit Prevention And Tax Reduction</b>	Legally Mine	
<p>This course is for practitioners who have already achieved a degree of success in their careers or, at the very least, those who have intentions of achieving success in the near future. Unfortunately, financial or professional success in your career makes you a candidate for attack from a trial attorney and his/her clients. This course will teach you how to lock out the trial attorney and, in the process, eliminate the threat of lawsuits. To your benefit, these same tools can also be used to significantly reduce your tax liability. You have worked hard to create your career; let us teach you how to keep control of all that you have worked for.</p>			
2:30 – 4:30 pm	<b>Outpatient Joint Replacement: More than Just a Surgical Approach</b>	Corentec	<b>Bronze Corporate Partner</b>
<p>In recent years there has been a tremendous interest in outpatient joint replacement. The latter desire stems from a combination of factors that includes our ability to implement better clinical pathways, the introduction of less-invasive</p>			

	<p>surgical approaches, the use of regional anesthesia, and advances in multimodal pain management. The turning economic environment in the health care and the introduction of bundle reimbursement, have also contributed to the rise in interest in outpatient total joint replacement.</p> <p>This symposium, that has convened experts with many years of experience in outpatient TJA, will provide the audience with a general and specific outlook on the rationale behind outpatient TJA, the issues that stand in the way of implementing outpatient TJA, and allows the experts to share their clinical path protocols.</p> <p>Faculty: Javad Parvizi, MD, Thomas D. Meade, MD, Peter F. Sharkey, MD, Gregg R. Klein, MD</p>		
<b>2:30-4:30 pm</b>	<b>Collaboration and Outcomes in the Era of Bundled Payments</b>	<b>Halyard Health</b>	<b>Bronze Corporate Partner</b>
	<p>Attendees will gain a deeper understanding of the necessary collaboration between orthopaedists and anesthesiologists in order to thrive in the new era of bundled payments. Topics of discussion will include:</p> <ul style="list-style-type: none"> <li>• Overview of the Comprehensive Joint Replacement program</li> <li>• Key metrics to watch in order to manage necessary outcomes</li> <li>• Observations on successful collaboration between orthopaedists and anesthesiologists</li> <li>• Examples from two programs that are implementing bundled payment models</li> </ul> <p>Faculty: Ryan M. Nunley, MD, Associate Professor of Orthopaedic Surgery, Washington University School of Medicine and Sonya A. Szlyk, MD, Director of Regional Anesthesia, North American Partners in Anesthesia, Mid-Atlantic Division</p>		
<b>2:30 – 4:30 pm</b>	<b>Same-Day Surgery: The Road to Outpatient Total Joint Replacement</b>	<b>Medtronic</b>	<b>Gold Corporate Partner</b>
	<p>The intent of this course is to provide the rationale for and discuss precedents and innovative methodologies for performing outpatient total joint surgeries, including but not limited to: patient selection, pain management, reimbursement considerations, as well as blood management and physical therapy to optimize patient outcomes. The course is intended to give health care providers additional tools and confidence to perform 23-hour/same day total joint replacement surgery.</p>		

5:00 – 7:00 pm	<b>Managing the Episode of Care, Less Pain Means More Gain</b>	<b>Pacira Pharmaceuticals, Inc.</b>	<b>Silver Corporate Partner</b>
	<p>Multimodal pain management has a profound impact on the quality, outcomes, and cost of a total joint arthroplasty episode of care. Its effective implementation leads to reduced opioid use, improved pain control, and more rapid mobilization, and results in decreased complications, length of stay, pain complaints, and cost. Other important factors include improved care coordination and patient education. In the context of the CJR model, optimizing the episode of care leads to opportunities for gainsharing.</p> <p>Within this unique educational gathering, we will highlight the importance of decreasing postsurgical opioid use, discuss cost bundling and gainsharing strategies, and explore the importance of patient engagement. Interactive tools will be showcased that allow pain management to be tailored, thereby improving the patient experience throughout the episode of care.</p>		
5:00 – 7:00 pm	<b>TJA Today – Recipe for BPCI / CJR Success</b>	<b>Smith &amp; Nephew</b>	<b>Gold Corporate Partner</b>
	<p>Over the last several years, there have been some dramatic changes in how the coordination of care occurs within the orthopedic environment. To successfully navigate these changes in today's bundled payment/CJR environment, surgeons need tools that help them improve patient satisfaction and efficiency while reducing complication and readmission risk. This symposium will focus on how standardized care protocols, improved implant kinematics and techniques, and new tools, such as robotics, will help you achieve these goals.</p>
