

TOWARD OPTIMAL EFFICIENCY IN TKA THE U2™ KNEE SYSTEM

United Orthopedic is refining TKA with the U2™ Knee System and two innovative surgical instruments designed to increase surgical flexibility, reduce the risk of infection, and ease the burdens associated with instrument cleaning and sterilization.

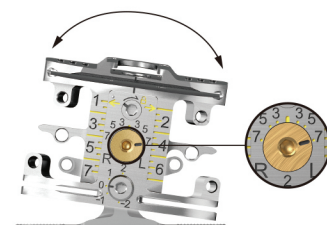

U2 Knee AiO™ All-in-One Block

Ultra-fine A/P adjustment from -2mm to +2mm promotes component positioning accuracy

Facilitates precision sizing and cuts for all 13 of United's femoral components

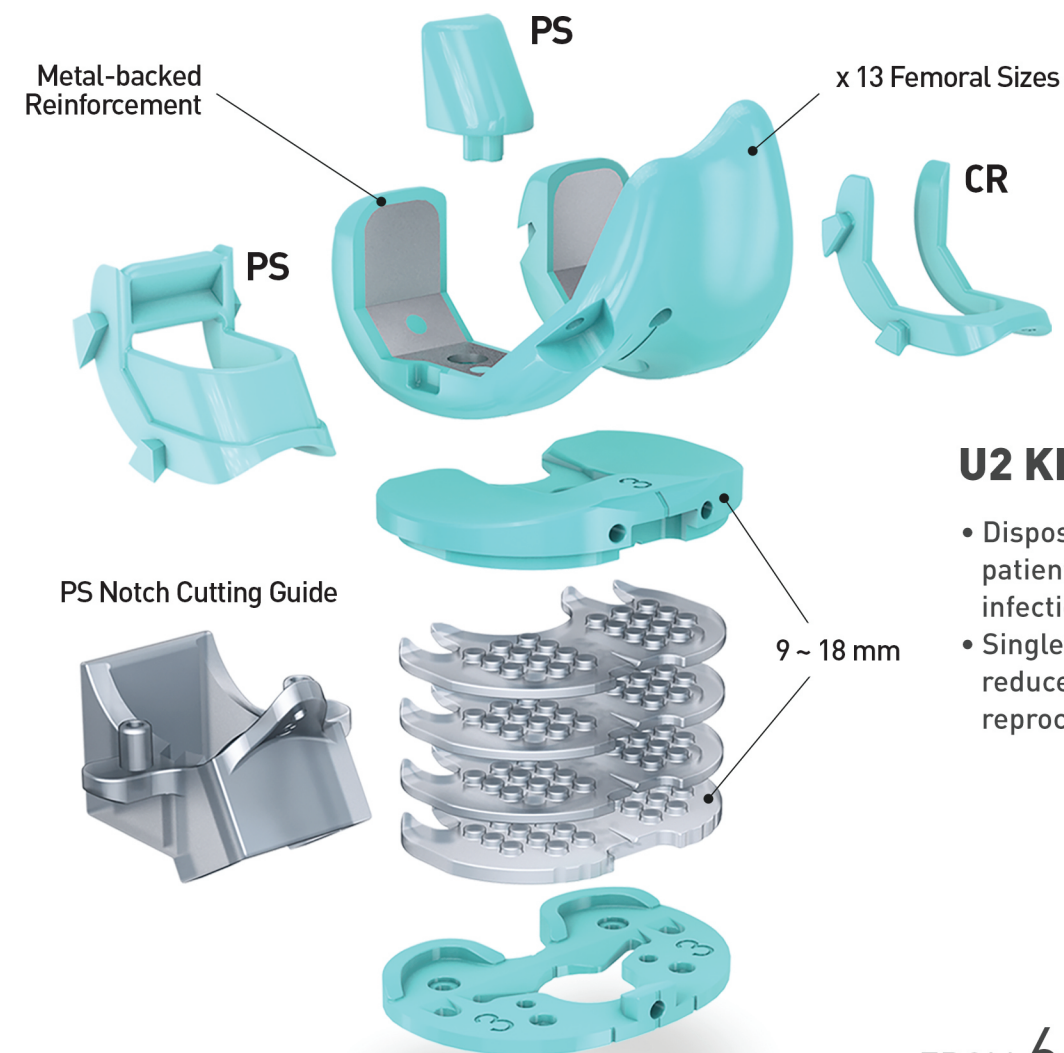

Permits external rotation adjustments from 3° to 7°

U2 KNEE AiO™ BLOCK – SIZER AND AP CUTTING JIG

- Supports both anterior and posterior referencing
- Guides all 13 sizes of anterior and posterior femoral cuts in one block
- Innovative, all-in-one design reduces the need to stock and sterilize multiple instruments

U2 Knee MDT™ Modular Disposable Trial

U2 KNEE MDT™ FOR TKA

- Disposable design improves patient safety by reducing infection risk
- Single-use convenience and reduced sterilization and reprocessing costs

FROM 6 TRAYS TO 1.5 TRAYS

REDUCE TABLE CLUTTER, MITIGATE INFECTION RISK.

When used together, the U2 Knee AiO™ Block and MDT™ can reduce instrument tray count from 6 to 1.5.
